# Discs

## Discs that can be played on this unit

CDs that bear the "COMPACT disc DIGITAL AUDIO" logo.

CD-R and CD-RW discs that have been correctly recorded in the audio CD format and finalized.  
Finalized CD-R and CD-RW discs that contain MP3/WMA files.

This unit can play back the above-mentioned disc types. It cannot play back the discs of the other types.

### Caution:

**Playback of any other type of disc could cause loud noise and damage to speakers as well as harm hearing. Never play back any other type of disc.**

- Copy-protected discs and other discs that do not conform to the CD standard might not play correctly in this unit. If you use such discs in this unit, MUJI LIMITED and its subsidiaries will not be responsible for any consequences or guarantee the quality of reproduction. If you experience problems with such non-standard discs, you should contact their issuers.

## About CD-R/CD-RW discs

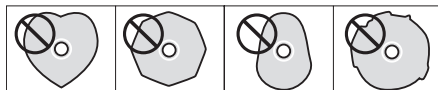

This unit can play back CD-R and CD-RW discs that have been recorded in the audio CD format (CD-DA). Also can playback MP3 and WMA files recorded into the CD-R/CD-RW discs.

- Discs created by a CD recorder must be finalized before use with this unit.
- Depending on disc quality and recording conditions, playback of some discs might not be possible. Please see the manual for the device that you used to create the disc.

- If you are uncertain about the handling of a CD-R or CD-RW disc, please contact the seller of the disc directly.

### Caution

- Do not play any disc that is warped, deformed or damaged. Playing such discs could cause irreparable harm to the playing mechanisms.
- Use a soft oil-based felt-tipped pen to write information on the label side. Never use a ball-point or hard-tipped pen, as this could cause damage to the recorded side.
- Never use a stabilizer. Using commercially available CD stabilizers with this unit will damage the mechanisms and cause them to malfunction.
- Do not use irregularly-shaped discs (octagonal, heart-shaped, business card size, etc.). CDs with these shapes could damage the unit.

## Handling precautions

- Always insert a disc with the label side up. Only one side of a Compact Disc can be played.
- If there are scratches, fingerprints, or stains on the recorded side (non-label side), an error may occur when attempting to play back a disc. Handle the disc carefully.
- To remove a disc from its storage case, press down on the center of the case and lift the disc out, holding it carefully by the edges.

How to remove the disc

How to hold the disc

# Discs (Continued)

---

## Storage precautions

- Discs should be returned to their cases after use to avoid dust and scratches that could cause the laser pickup to “skip.”
- Do not expose discs to direct sunlight or high-temperature and humidity for extended periods. Long exposure to high temperatures will warp discs.
- CD-R and CD-RW discs are more sensitive to the effects of heat and ultraviolet rays than ordinary CDs. It is important that they are not stored in locations where they will be exposed to direct sunlight. They should also be kept away from sources of heat, such as radiators and heat-generating electrical devices.
- Dirt on the disc may cause the sound to skip or reduce the sound quality. Be sure to keep the discs clean.

## Maintenance

- If a disc becomes dirty, wipe its surface radially from the center hole outward towards the outer edge with a soft, dry cloth.

- Never clean discs using chemicals such as record sprays, antistatic sprays and fluids, and thinner. Such chemicals will do irreparable damage to the disc's plastic surface.

# MP3/WMA Compatibility

---

This unit can play MP3/WMA files recorded on a CD-R, CD-RW discs.

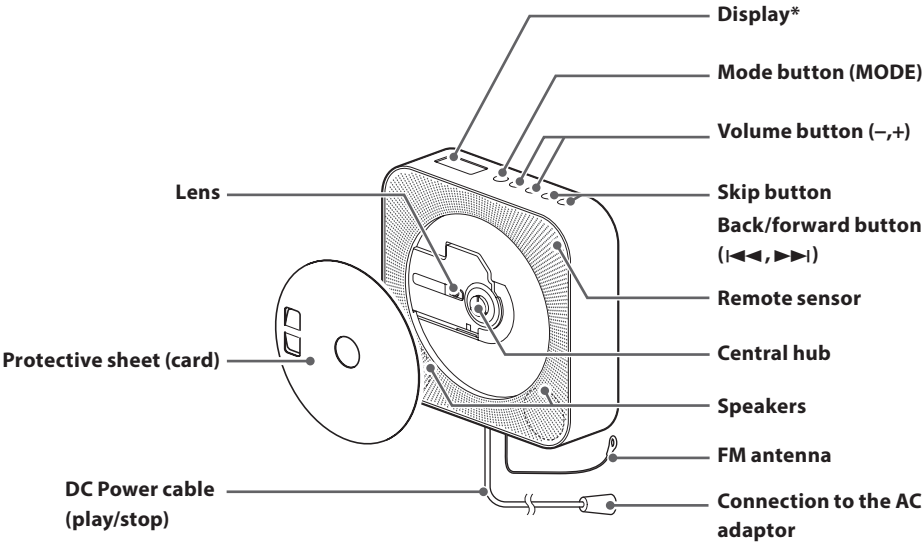

- This unit can play back monaural and stereo MP3 files that are in the MPEG-1 Audio Layer 3 format with a sampling rate of 16 kHz or 48 kHz and a bit rate of 32 to 320 kbps.
- WMA file must have a sampling rate of 32 kHz, 44.1 kHz or 48 kHz, and a bit-rate of 48 to 192 kbps.
- This unit cannot play copyright protected files.

## Cautions when preparing MP3/WMA files using a computer or other device

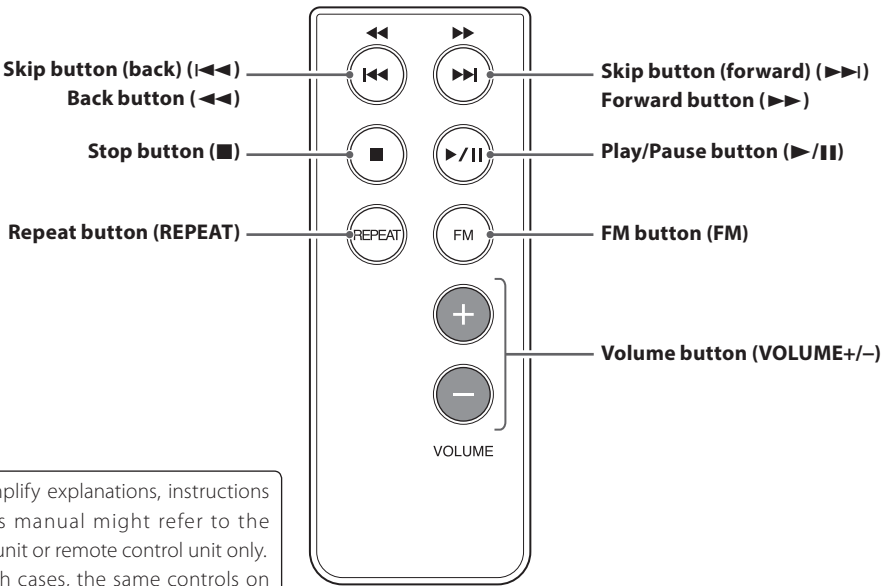

- Always include the extension in the file name. This unit recognizes MP3 files by their “.mp3”, and WMA files by their “.wma” file extensions.
- Always close the session (complete disc creation). This unit cannot play discs if the session has not been closed.
- If the disc contains more than 999 files or 99 folders, this unit cannot play it back correctly.

# Identifying the Parts

## Main unit

## Remote control unit

To simplify explanations, instructions in this manual might refer to the main unit or remote control unit only. In such cases, the same controls on the remote control and main unit will operate similarly.

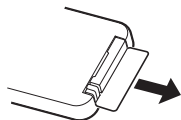

# Remote Control Unit

## Notes on using the remote control unit

- Even if the remote control is used within its effective operation range (5 m/16 feet), the unit might not respond to the remote if there are any obstacles between them.
- The remote control might not function if sunlight or other bright light shines directly on the remote sensor of the unit.
- The remote control might function incorrectly if it is operated near other products that generate infrared rays or if other remote control devices that use infrared rays are operated near the unit. Likewise, the other products might also function incorrectly.

## Before using the remote control

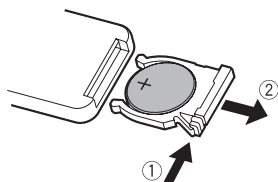

When you use the remote control for the first time, pull out the insulation sheet from the rear.

## Battery replacement

The battery has been installed in the remote control unit when shipped from the factory.

To replace the battery, pull out the battery tray from the rear, put the lithium-ion battery (CR2025) in with the "+" side facing up, and insert the tray again.

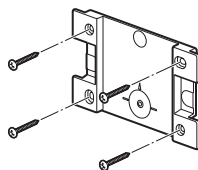

## Battery replacement time

If the distance required between the remote control unit and main unit decreases, or the remote control unit's buttons don't work, the battery is exhausted. In this case, replace the battery with a new one.

For information about the collection of batteries, please contact your local municipality, your waste disposal service or the place where you purchased them.

# Installation Method

## 1 Attach the wall-fixing plate to the wall.

Choose a sturdy wall, and install the wall-fixing plate using the supplied screws or other fixings.

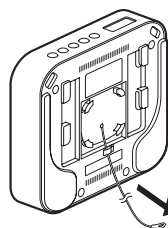

- Make sure that the wall-fixing plate does not feel shaky or loose.

## ⚠ Caution

**Be very careful when attaching the wall-fixing plate to the wall.**

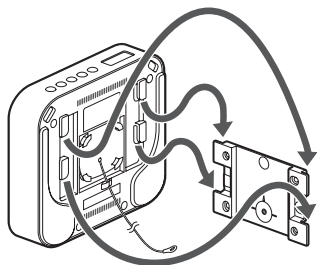

- When attaching to walls made of plasterboard or concrete construction etc. please make sure that you use proprietary fixings that are appropriate for the wall. In particular, it is very hazardous to use regular wood screws on walls that are made of plasterboard or a similar type of material.

## 2 Extend the FM antenna.

Unwind the FM antenna on the rear, and extend it.

### 3 Attach the unit to the wall-fixing plate.

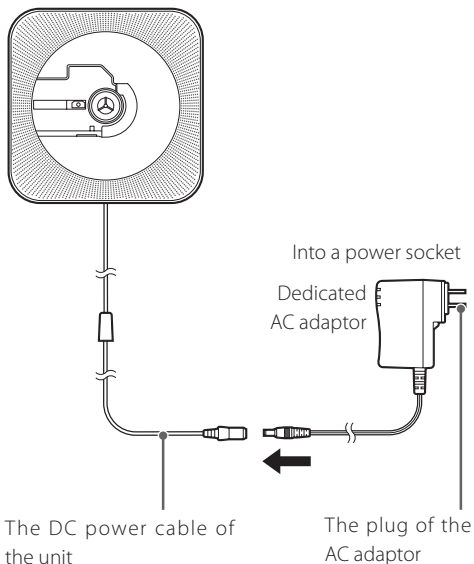

Line the unit up with the wall-fixing plate and clip the back of the unit on at the slots.

- Make sure that the unit is firmly attached.
- Extend the FM antenna fully and position for the best reception.

## Connecting the AC adaptor
